

🚩 **Our task**

Create a stable revenue stream for cryptocurrency holders, giving businesses access to short and medium term capital at reasonable yields.

We provide an institutionally organized model: we pool investor funds and redistribute liquidity to the B2B lending segment - to finance SMEs, development projects, logistics chains and digital products.

Grantha digital model for high-yield loan capital

**Lending to startups**

Investing in promising start-ups, innovative research and technology development.

**Investment in transport**

Leasing services for cars, lorries and other vehicles for business and private customers.

**Investments in construction**

Construction projects in high demand regions in Asia, Europe and other countries.

**Business+ lending to SMEs**

Financial support for small and medium-sized enterprises in production, logistics, export and other areas.

**P2B and MFIs**

Short-term financial solutions for individuals and businesses through lending.

Granthaera operates at the intersection of two systems: the crypto market and the classical capital market. Granthera accumulates investors' funds in USDT, BTC, ETH and other assets and provides them in the form of loans to legal entities on market conditions, but in shorter terms and without banking bureaucracy.

Positioning and structure

Deposit programs

- Reinvestment is available on a daily basis.
- Profit withdrawal is available on a daily basis.
- The initial investment is returned when the plan ends.

Main activities and mission

Granterha manages a loan pool with multi-sectoral diversification. Funds are channeled into several key areas:

Development (land plots, primary construction)	01
Digital sector (IT companies, SaaS, startups)	02
Transportation and logistics	03
P2B lending for e-commerce and B2B	04

The company's mission — is to institutionalize crypto-capital: to make it a source of stable income and provide businesses with efficient access to quick loans in digital assets.

Capital protection mechanisms

The safety of investor capital is ensured by four levels of control:

Safe Protocol

security protocol with transparent allocation and protection through participant voting.

Borrower audit

Mandatory review of financial statements, payment history, and beneficiary registries.

Diversification

distribution of funds among different sectors and categories of borrowers.

Blockchain control

all transactions are recorded in the chain, eliminating non-transparent transactions.

Referral system

The company scales through both organic growth and affiliate networks. To ensure liquidity and investment inflow, Granthera implements a tiered affiliate system with referral rewards:

Referral Table

	Line 1	Line 2	Line 3	Line 4	Line 5	Line 6	Line 7	Line 8	Line 9	Line 10	Line 11	Line 12	Line 13	Line 14	Line 15	Line 16	Line 17	Line 18	Line 19	Line 20
